range of ACO Drainage**

**ACO. The future
of drainage.**

ACO system chain – integrated solutions for tomorrow’s environmental conditions

Increasingly extreme weather must be counteracted by more complex and sophisticated drainage concepts. ACO achieves this with intelligent system solutions which have a dual purpose: protecting people from water, and safeguarding water from people.

ACO has thus created its unique Surface Water Management Cycle “Collect – Clean – Hold – Release”: the four core processes now required for the complete and sustainable management of surface water drainage.

How do you protect buildings, and design covered surfaces?

ACO is the world leader in the design and manufacture of surface drainage systems. ACO DRAIN® is designed to carry surface water and other liquids efficiently from the surface to the underground drainage system. The comprehensive range offers a solution for any application, load class or hydraulic capacity.

ACO DRAIN®

Line drainage solution

- No jagged surfaces
- Less excavations,
less pipe work
- Quick drying surfaces
- Receiving and discharging
in one system

ACO Systems FZE

Established in 2006, ACO Systems FZE provides the highest levels of support and service to over 20 countries throughout the Middle East and parts of South Asia and Africa.

As part of ACO Group, we are world leaders in the supply of various internal and external drainage systems since 1946. With a 10,000 sqm manufacturing facility and a team of 50+ employees, we specialise in stainless steel drainage products with an emphasis on customised and hygienic solutions.

Hygiene**First**

Hygienic Kitchen Drainage

Commercial Kitchen environments, hot water and grease must be counteracted by more complex and sophisticated drainage concepts. ACO achieves this with intelligent system solutions which address food safety, people and water protection. Every product within the ACO system safely controls the water as it passes along the chain to ensure that it can be hygienically, economically and ecologically handled.

Attractive Bath Drainage

More and more builders and architects are opting for a generous, open-plan bathroom design. The features of this new bathroom design style are clear lines high-quality materials and floor-level showers. Flush to the floor shower channels or shower gullies are comfortable, safe and therefore particularly suitable for people with physical handicaps. Floor level bathroom drainage also offers new aesthetics options in the area of bathroom design. To make cleaning easier, and to prevent dirt adhering in the first place, the surfaces of all ACO products are produced without any seams or cracks.

Do you want drainage solutions in cast iron?

Floor Drains and Cleanouts

ACO Floor Drains are designed to use in finished floor areas with an adjustable frame and grate, a membrane clamp ring with weep holes and an optional ss silt basket. ACO provides a range of cast iron floor drains to suit almost any application, from pedestrian areas to any commercial or residential.

Nickel Bronze floor grates and covers are available both as screw-fastened and hinged options. There are a number of options of outlets available.

Roof Drainage

Flat roofs, parking decks, balconies, facades and terraces are all architectural features with their own special problems. They all benefit in particular from professional planning of the drainage aspects.

In the light of the general increase in the occurrence of heavy rainfall, we have adjusted to the changing conditions and developed a complete system which delivers the optimum drainage solution for every situation.

Are you searching for optimal water treatment solution?

Grease Separator Technology

Commercial kitchens generating waste water must have pre-treatment plants to ensure that solids and liquids that release harmful or unpleasant vapours or interfere with operations are not discharged into the public sewerage network. Otherwise very greasy wastewater puts the pipe systems and drainage equipment at risk. Grease and oils are deposited with other wastewater components on the walls of the pipes and can lead to corrosion, blockages and noisome smells.

ACO Grease Separator for full disposal
