

ACO. creating the future of drainage

ACO Systems FZE – drainage and water treatment solutions

Fashion Avenue, Dubai Mall

Nikki Beach Resort & Spa at Pearl Jumeirah Island, Dubai

Marsa Al Seef, Dubai

Jebel Ali Container Terminal, Dubai

**ACO. creating
the future of drainage.**

The ACO system chain provides the drainage solutions for tomorrow's environmental conditions.

Increasingly extreme weather must be counteracted by more complex and sophisticated drainage concepts. ACO achieves this with intelligent system solutions which have a dual purpose: protecting people from water, and water from people.

Every ACO product within the ACO system chain therefore safely controls the water as it passes along the chain to ensure that it can be ecologically and economically reused in a viable way.
